

Google Apps for Education

Google Classroom offers teachers and pupils an online learning and teaching platform. In many cases, lesson resources and revision materials will be made available through Google Classroom. Guidance on how to access Google Classroom will be available from our School website, but your child will have experience of doing so.

Downloading Apps to home devices

Google Classroom can be accessed using a Desktop PC, Laptop, Chromebook, Tablet or Mobile Phone (of both Android and Apple OS). If accessing via a tablet or mobile phone, your child will need to download the following apps via the App or Play store.

1. Google Classroom 

This is where teachers will upload and share resources and it will also allow communication between the teacher and your child.

2. Google Drive 

This will allow your child to store any documents that they are working on e.g. word documents or presentations.

3. Google Docs 

This will allow word processed documents to be created.

4. Google Slides 

This will allow presentations to be created.

Google Classroom is a secure site and will not allow anyone outside the C2k Domain to gain access. Teachers will also be proactive in ensuring there is no misconduct carried out.
